DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2,5-6, 9-10 drawn to methods and systems for an advertisement device to accept or cancel registration information of a communication terminal to receive advertisements, classified in class 705, subclass 14.
 - II. Claims 3-4, 7-8 and 11-12 drawn to methods and systems for registering advertisement pages and search means for searching the registered URLs, classified in class 705, subclass 14.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as registering advertisement pages and search means for searching the registered URLs. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 4. Since the examiner knows from past experience that an election will usually not

be made by telephone, this restriction is proper under MPEP 812.01.
